

# *We Dream of a School....*

We Dream of a School that meets the needs of the children of the 21st century

- that builds their capacity to think
- to be both independent and collaborative
- encourages creativity and innovation
- and gives them the opportunities that will allow them to fly

We Dream of a School that teaches to the specific needs of its children

- that has high expectations and clear expectations
- gathers information from reliable data
- is true to the children in our care

We Dream of a School that values the wellbeing of the children

- that supports children to live in their world, not hide away from it
- is a safe place for children to be
- builds resilience, empowerment and confidence
- that develops articulate children who can use their voice to build a better world

We Dream of a School that is a learning community

- that works in partnership with families
- that shares the vision for success of its children
- that speaks the same language for education

We Dream of a School that is fluid and cohesive

- teachers and staff who have a vision for learning opportunities
- who share common goals
- who model lifelong learning
- who build relationship within our community

We Dream of a School based on the values of our faith

- that is welcoming
- where all can belong
- that acknowledges our call to the service of others

We Dream of a School where one day parents will say "...they know my child..."
